Senior Program Manager | Certified Scrum Master (CSM) | 8+ Years of Experience

SUMMARY

Confident and results-oriented IT Program Manager with over 8+ years of experience leading cross-functional teams and delivering complex technology initiatives that achieve business objectives. As a Certified Scrum Master (CSM), I am skilled in Agile and Waterfall methodologies, effectively managing high-impact projects from start to finish.

I excel in strategic planning, resource allocation, stakeholder engagement, and risk mitigation, ensuring projects stay aligned with client goals and quality standards. Known for driving operational excellence, I consistently achieve on-time and within-budget project completion across diverse enterprise environments. Optimizing workflows, and ensuring on-time, within-budget project completion across diverse enterprise environments.

TECHNICAL SKILLS

- **Program & Project Management:** Strategic planning, execution, and delivery of IT programs across multiple domains.
- **Agile & Waterfall Methodologies:** A hands-on experience with Scrum, Kanban and traditional Waterfall approaches.
- **Certified Scrum Master (CSM):** Strong Agile leadership with proven ability to drive sprint planning, retrospectives, and backlog grooming.
- **Stakeholder & Client Management:** Effective communication with internal and external stakeholders to align expectations and deliver value.
- **Team Leadership & Collaboration:** Leading cross-functional teams, mentoring team members, and fostering a collaborative work environment.
- **Risk & Issue Management:** Identifying, analyzing, and mitigating project risks to ensure successful delivery.
- **Budget & Resource Management:** Managing program budgets, resource allocation, and forecasting to optimize project outcomes.
- **Performance Tracking & Reporting:** Creating and presenting dashboards, KPIs, and executive-level reports for project health and progress.
- **End-to-End Project Delivery:** Managing full project lifecycle from initiation and planning to execution, monitoring, and closure.
- **Process Improvement:** Continuously analyzing and refining workflows to improve efficiency and quality.
- **Tools & Technologies:** JIRA, Confluence, MS Project, Azure DevOps, Excel, Power BI

PROFESSIONAL EXPERIENCE

Program Manager - Program Management

Jul '17 - Present

Jio Platforms Limited

Mumbai, IN

Project Management Methodologies

Successfully delivered multiple large-scale software projects on time and within budget using **SDLC** and **Risk-based Project Management** approaches. Took a proactive stance towards identifying risks early and putting the right mitigations in place from the beginning.

Task Management

Managed project tasks by balancing **Agile** and **Waterfall** methods, depending on what suited the client's requirements best. Ensured flexibility without compromising on timelines or quality.

Planning & Retrospectives

Led **planning sessions** and **retrospectives** regularly to encourage continuous learning and process improvements. Helped the team reflect, adapt, and perform better with every project.

Kanban Process Implementation – JioAttendance

Played a key role in setting up the **Kanban process** for the JioAttendance project, which improved delivery speed and brought better visibility to the workflow, resulting in higher team efficiency.

Stakeholder Communication

Maintained clear and regular communication with all stakeholders. Shared timely updates to ensure transparency and kept everyone aligned on project goals and progress.

Pre- & Post-Delivery Activities

Handled all crucial pre- and post-delivery tasks, including thorough quality checks and smooth handovers. This ensured a hassle-free rollout and client satisfaction every time.

Product Owner Collaboration

Worked closely with **Product Owners** to manage the backlog and handle new feature requests. Made sure we delivered high-quality solutions as per expectations and timelines.

Vendor Coordination

Coordinated with vendors for timely delivery of project components. Helped streamline dependencies and ensured nothing held up the overall progress.

SCRUM Ceremonies

Took up the role of **SCRUM Master**, leading **daily stand-ups**, **sprint planning**, **reviews**, and **retrospectives**. Focused on keeping the team aligned and the process smooth. Helped the team stick to **Agile practices**, which led to more consistent sprint deliveries and better overall team coordination.

Reporting to Senior Management

Prepared detailed reports — monthly, quarterly, and yearly — for senior leadership, highlighting project status, risks, and achievements to support strategic planning.

Resource Fulfillment

Collaborated with HR and various internal teams to ensure proper staffing across projects. Ensured the right talent was available at the right time to meet delivery needs.

Additional Highlights

- Part of the **Services Platform** team, providing **location-based APIs** to enterprises.
- Coordinated with vendors to meet business requirements on time.
- Successfully onboarded **30+ new businesses** through effective business discussions and alignment.
